Tutti Space

**Location**  
London, UK

**Scope of work:**  
Product Design  
Frontend and  
Backend  
QA

**Website:**  
tutti.space

## The Challenge

Implementing features in bulk which cause continuous development and resolve the issue on production than normal application flow.

Integrating third party libraries and adjust the application code accordingly which at times can be a challenge.

Reducing the application loading time while opening the web application for the very first time.

# The Impact

Initially there was a lot of brainstorming between designers, developers from SixBerries and after that a final design along with a development approach was presented.

The development team started off with changing the look and feel of application. They came up with an unusual UX view to make it more appealing to its customers. The developers had to find and develop an innovative idea in order to allow Hosts to create a space in the application. Furthermore, the team had to change the way of communication between Hosts and Artists during the space bookings.

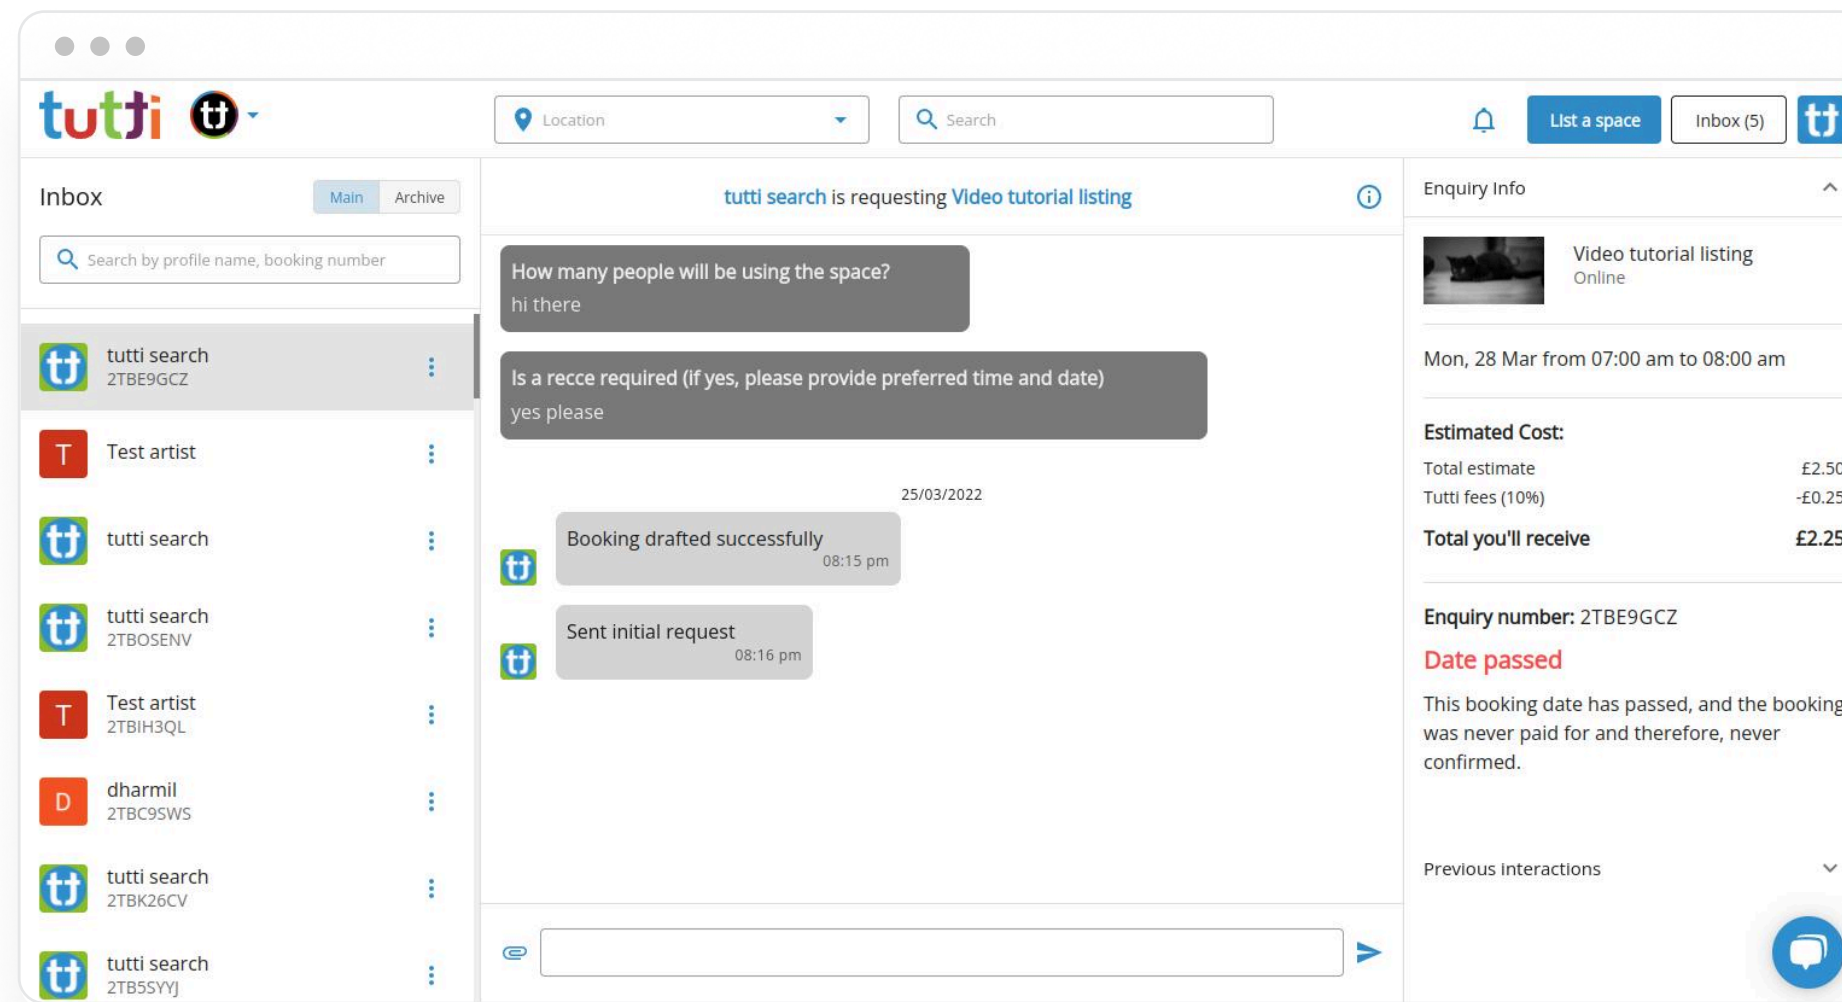

The screenshot shows a detailed listing for 'Studio 1' at '69 drops studios - Whitechapel'. The listing features a grid of six photos showing the interior of the studio. Below the photos, the listing includes the name 'Studio 1', location 'Whitechapel, London', capacity '50 people', and duration '4 hours min'. The price is listed as 'From £500 /half-day'. There are options to 'Share' and 'Save' the listing. The booking section asks 'When would you like the space?' and includes a 'Booking Date\*' field, a checkbox for 'I'm flexible on dates and times', and a checkbox for 'Book multiple days'. There are also 'Start time' and 'End time' dropdown menus. A prominent orange 'Start enquiry' button is present, with the text 'You won't be charged yet' below it. At the bottom, there is a 'Message Host' button and the host's name '69 drops studios' with their last active date '04/03/2022'.

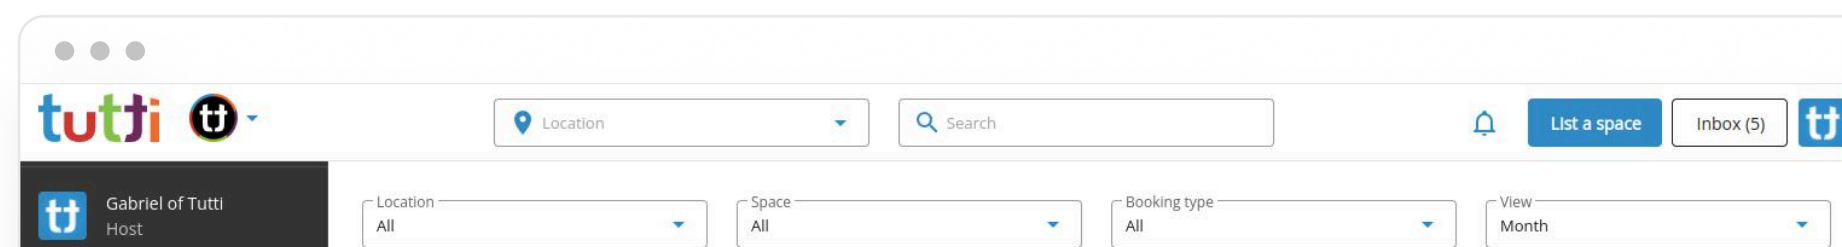

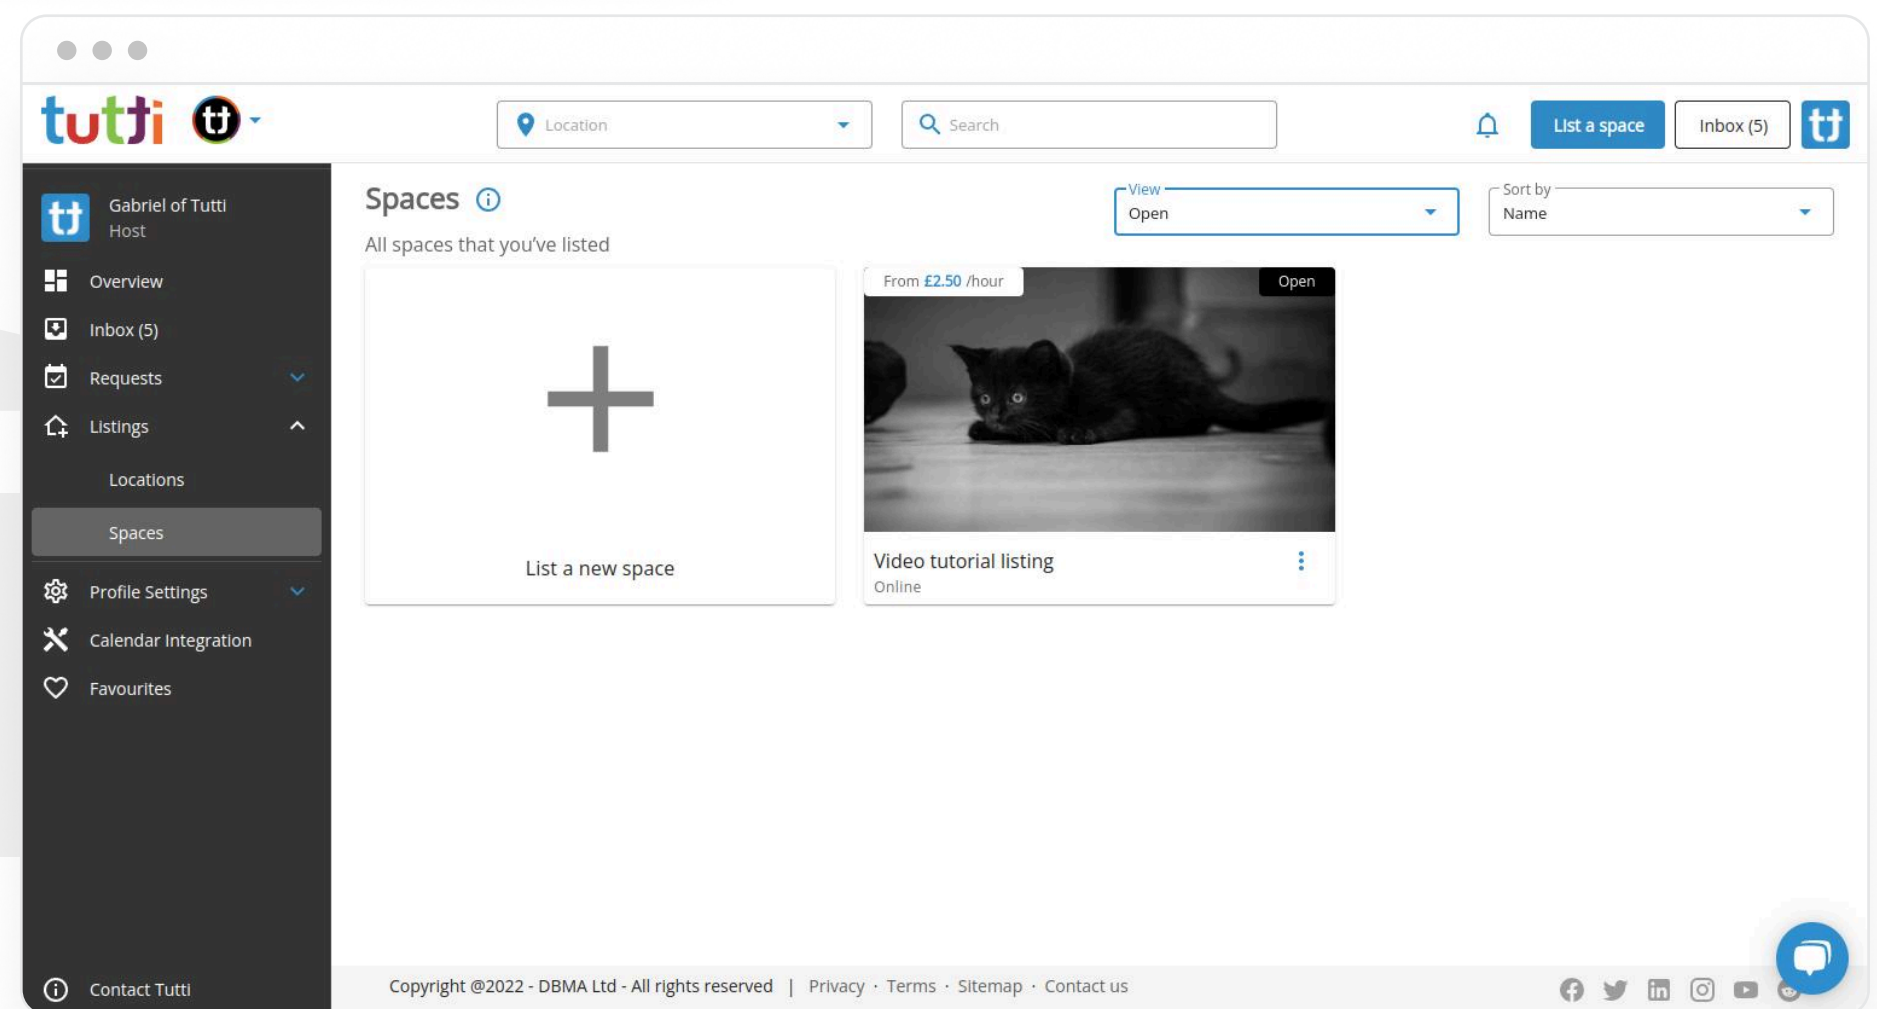

The screenshot shows the search page of the Tutti website. The header includes the Tutti logo and navigation links. The main content area features a large banner image of a theatre interior with the text 'TARA X THEATRE' and 'Hire amazing local spaces for any creative use'. Below the banner is a search bar with the question 'Where do you need space?' and a dropdown menu showing 'e.g. London, Shoreditch, Abbey Road, Stratford'. There is also a 'Search anything' field with the placeholder text 'Requirements, name of host, type of space, anything at all'. A blue 'Search' button is located to the right of the search bar. Below the search bar, there is a filter for 'Striking theatre in Earsfield'. At the bottom, there is a section titled 'What are you creating?' with five buttons: 'Music', 'Theatre', 'Dance', 'Video/Film/TV', and 'Photo'. A large orange rectangle is positioned below the 'What are you creating?' section, with a dashed orange line extending from its bottom right corner.

On the backend front, team used the advance database techniques to get meaningful search results which improved the overall customer experience of the application.
